The global Hydrogen Peroxide Purification Resin market size is predicted to grow from US\$ 91.56 million in 2025 to US\$ 165 million in 2032; it is expected to grow at a CAGR of 8.9% from 2026 to 2032.

In 2025, global sales volume of Hydrogen Peroxide Purification Resin is estimated at approximately 5,200 tons on a wet finished product basis, with an average global market price of about USD 18/kg. The gross margin of major manufacturers is estimated at around 35%-50%.

Hydrogen Peroxide Purification Resin is a functional resin material used for the refining and high-purity treatment of hydrogen peroxide. It mainly reduces anthraquinone derivatives, organic carbon, metal ions, anions, and other trace impurities in hydrogen peroxide through adsorption, ion exchange, and selective removal. The product typically includes macroporous adsorption resin, cation exchange resin, and anion exchange resin, which can be used in combination according to the quality requirements of industrial-grade, electronic-grade, and high-purity hydrogen peroxide. Key performance indicators include organic impurity removal capability, metal ion control capability, oxidation resistance, low leachables, mechanical strength, purification efficiency, and service life.

The upstream raw materials of Hydrogen Peroxide Purification Resin mainly include styrene, divinylbenzene, acrylic monomers, functional monomers, crosslinking agents, porogens, and modification additives. The midstream production process involves polymerization and bead formation, pore structure control, functional group introduction, washing and ion-form conversion, particle size classification, and purification treatment to produce specialty resin products. Downstream applications mainly include industrial

hydrogen peroxide purification, electronic-grade hydrogen peroxide purification, food/pharmaceutical-grade hydrogen peroxide purification, and reagent-grade hydrogen peroxide preparation. It is a key separation material for improving the purity, stability, and downstream application compatibility of hydrogen peroxide.

United States market for Hydrogen Peroxide Purification Resin is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
