## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Hydrolase is a class of enzyme that commonly perform as biochemical catalysts that use water to break a chemical bond, which typically results in dividing a larger molecule into smaller molecules.

The global market for Hydrolase Enzymes is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The key hydrolase enzymes are lipases, glycosidases, esterases, peptidases, nucleosidases, and phosphatases among others. The increasing prevalence of the product in the treatment of pancreatic insufficiency is expected to boost the demand in the forthcoming years.
