The global Hydrophilic Coating Guidewires market size is predicted to grow from US\$ 1345 million in 2025 to US\$ 1964 million in 2032; it is expected to grow at a CAGR of 5.7% from 2026 to 2032.

Hydrophilic coated guidewire refers to an interventional guide wire coated with a hydrophilic polymer coating on the surface of the guide wire, usually distal or full-length, which significantly reduces the friction coefficient when in contact with water. Its core function is to form a lubricating layer in the blood or physiological saline environment, significantly improving the wire's passability in narrow, tortuous or complex anatomical structures, reducing the risk of mechanical friction and damage to the vascular wall, and widely used in coronary intervention, peripheral vascular intervention and other intracavitary operation scenarios. In 2025, global Hydrophilic Coating Guidewires production reached approximately 16.37 M Units, with an average global market price of around US\$ 84 per Units.

The hydrophilic coating guidewire has evolved from an auxiliary tool for difficult lesions to a basic configuration in complex interventional procedures. The demand growth mainly comes from the increasing proportion of complex lesions, the popularization of minimally invasive interventional technology, and doctors' higher requirements for feel and efficiency; Structurally, the market presents a clear stratification, with low-end fully hydrophilic standard products under continuous price pressure from centralized procurement and cost pressures, while high-end mixed coatings, gradient hardness, and high torque designs maintain strong bargaining power in complex lesions and CTO scenarios. The focus of competition has shifted from simple passability to coating durability, risk control of detachment, manipulation feedback, and long-term clinical safety evidence. Manufacturers who can establish barriers in coating technology, core

wire structure, and batch consistency are more likely to maintain stable market share and profitability in the high-end market.
