Hydrophilic silicone oils are silicone oils that show hydrophilic properties by modifying the polymer chain with functional groups such as epoxy and polyether. These oils can be easily emulsified and applied to textiles in any ratio. Thanks to their shear and electrolyte stability, they do not exhibit any stability problems after dilution or in the application of emulsions in finishing processes, even under harsh conditions. We offer you our innovative products that not only increase the hydrophilicity but also improve softness to the fabric applications in towel, wool or knitted fabrics.
