HPC catalysts are catalysts used in the hydroprocessing. Hydroprocessing is the name given to a series of chemical reactions that take place as part of oil refining, and include hydrogenation, hydrocracking and hydrotreating. Hydroprocessing is necessary to remove pollutants like sulfur, nitrogen and heavy metals from fuel oils, as well as in the process of catalytic hydrocracking, where large hydrocarbon molecules are cracked into shorter ones that can be used as fuel oils.

Hydro-processing Catalysts is a high technical barrier market with limited suppliers. Market concentration is high. The top 3 players Advanced Refining Technologies (ART), Albemarle and Criterion takes a combined global market share of 62.41% in 2016. Other suppliers like Haldor Topsoe, UOP (Honeywell) and Sinopec takes a smaller share in the market.

Globally, production of HPC is concentrated in USA, Europe, etc. while consumption of HPC is widely spread in global market. The market in emerging countries, like China, Southeast Asia and Middle East is projected to be new growing point, while market in Europe is more modest in terms of stable light oil demand in European countries.

According to this study, over the next five years the Hydroprocessing Catalysts (HPC) (Hydro-processing Catalysts) market will register a xx% CAGR in terms of revenue, the global market size will reach US\$ xx million by 2024, from US\$ xx million in 2019.
