The global Hydroxy Acid market size is predicted to grow from US\$ 13007 million in 2025 to US\$ 19406 million in 2032; it is expected to grow at a CAGR of 5.9% from 2026 to 2032.

Hydroxy Acid is organic compound containing both a hydroxyl group (-OH) and a carboxylic acid group (-COOH) within the same molecule, enabling unique chemical reactivity and multifunctional applications. Hydroxy acids are broadly classified into alpha hydroxy acids (AHAs), beta hydroxy acids (BHAs), polyhydroxy acids (PHAs), and specialty hydroxy carboxylic acids, and are widely used in cosmetics, pharmaceuticals, food additives, biodegradable polymers, metal cleaning, textile processing, and chemical intermediates. Common examples include glycolic acid, lactic acid, citric acid, salicylic acid, and malic acid. The supply chain of hydroxy acids begins with upstream raw materials such as petrochemical feedstocks (ethylene, benzene, propylene), natural sugars, starch, corn, molasses, fruits, and fermentation substrates. Intermediate production involves chemical synthesis, catalytic oxidation, hydrolysis, or microbial fermentation processes to produce crude hydroxy acids, followed by purification, crystallization, concentration, and formulation into industrial, cosmetic, pharmaceutical, or food grades. Midstream participants include specialty chemical manufacturers, fermentation technology providers, and ingredient formulators. Downstream industries include skincare and personal care, pharmaceuticals, food and beverages, biodegradable plastics, industrial cleaning chemicals, textiles, leather processing, and agriculture, where hydroxy acids are utilized for exfoliation, pH regulation, preservative functions, polymer synthesis, chelation, and bio-based material production. In 2025, global Hydroxy Acid output was about 9 million tons with 11 million tons of capacity, average prices of USD 1,200-2,500 per ton, and gross margins around 27%.

United States market for Hydroxy Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
