The global IBS (Intelligent Braking System) market size is predicted to grow from US\$ 3388 million in 2025 to US\$ 17220 million in 2031; it is expected to grow at a CAGR of 31.1% from 2025 to 2031.

Automobile intelligent braking system (IBS) is called electric brake booster. It is composed of mechanical device and electronic control unit. It senses the force and speed of the driver stepping on the brake through the sensor, and transmits it to the electric control unit. After the signal processing, the electronic control unit transmits the signal to the servo motor in the booster mechanism. Driven by the amplification mechanism of mechanical transmission, the main brake pump is pushed to work, so as to realize electricity Control action.
