The global Medical Vacuum Regulator market size is predicted to grow from US\$ 166 million in 2025 to US\$ 235 million in 2031; it is expected to grow at a CAGR of 6.0% from 2025 to 2031.

Medical Vacuum Regulator is a medical device that converts the high-pressure vacuum that is supplied by the hospitals central vacuum system to a safe level for use on a patient.

The vacuum regulator is used to measure and adjust the vacuum level within the context of medical suction. It enables to drain substances out of the patient's body during surgical procedures. The vacuum regulator should be connected to a vacuum source on the wall either using a direct probe or a rail mounting system. It should be associated with a collection jar and a suction hose.

Global Medical Vacuum Regulator key players include Ohio Medical, Amico, Precision Medical, Air Liquid Healthcare, Integral, etc. Global top five manufacturers hold a share about 35%.

North America is the largest market, with a share about 40%, followed by Europe and Asia-Pacific, having a total share about 55 percent.

In terms of product, Analog Vacuum Regulator is the largest segment, with a share about 70%. And in terms of application, the largest application is in Clinical, followed by Surgical.
