## Abstracts

The global Implant-grade Polyetheretherketone (PEEK) market size is predicted to grow from US\$ 125 million in 2025 to US\$ 223 million in 2032; it is expected to grow at a CAGR of 8.6% from 2026 to 2032.

In 2025, global Implant-grade PEEK production reached approximately 230 tons, with an average global market price of around US\$556 per kilogram. Polyetheretherketone (PEEK) is a high performance semi-crystalline engineering thermoplastic. Implant-grade PEEK is a medical implant material that meets medical requirements. PEEK is a polyaromatic semi-crystalline thermoplastic polymer with mechanical properties favorable for bio-medical applications.

The global implant-grade PEEK market has reached a mature commercial stage. Over 15 million PEEK polymer devices have been implanted worldwide, supported by more than two decades of clinical application validating the material's long-term biosafety and mechanical reliability. In spinal fusion, trauma fixation, joint replacement, and dental implantation, PEEK is progressively established as an alternative to conventional metals, with its radiolucency and biocompatibility gaining consistent clinical acceptance. Structural demand is driven by global population aging, as the incidence of degenerative spinal conditions and orthopedic trauma rises with age, creating inelastic demand for implantable devices. The growing adoption of minimally invasive surgical techniques further favors radiolucent materials like PEEK over metals. Steady increases in healthcare expenditures across major economies provide the payment foundation for advanced implant materials. Regional dynamics differ, with North America and Europe holding major market shares due to mature surgical systems and robust reimbursement frameworks, while the Asia-Pacific region exhibits relatively faster growth, supported by increasing regulatory approvals for PEEK implants and accelerating domestic adoption.

Overall, implant-grade PEEK maintains a stable market foundation with continued growth potential.
