The global Indoor Solar Panels and Solar Cells market size is predicted to grow from US\$ 99 million in 2025 to US\$ 202 million in 2032; it is expected to grow at a CAGR of 9.6% from 2026 to 2032.

In 2025, global Indoor Solar Panels and Solar Cell reached approximately 315 k kits, with an average global market price of around US\$ 456.1 per kits. Gross margin is about 28%. The cost is 328.4 usd. Production Capacity is about 400 k kits. Indoor Solar Panels and Solar Cells are made up of photovoltaic cells that capture and convert solar power into electricity. The portable panels are then attached to one another and connected to a battery to store the energy produced by the sun. The upstream of the Indoor Solar Panels and Solar Cell industry chain mainly includes suppliers of key components such as silicon wafers, solar cells, glass, encapsulation materials and inverters, while the downstream covers panel manufacturers, residential users, building integration and small energy system application markets, forming a complete closed loop from raw material supply, component production to installation and after-sales service.

As of 2026, indoor solar cells are evolving from small photovoltaic components into embedded energy solutions for low-power IoT devices. With the continued growth of electronic shelf labels, smart sensors, remote controls, smart home terminals, asset trackers, and industrial wireless monitoring devices, demand is increasing for low-light power generation, ultra-thin flexible design, long service life, and maintenance-free energy supply. Future products will focus more on conversion efficiency under indoor lighting, surface integration, customized sizes, flexible packaging, and integration with rechargeable batteries and energy management ICs. Overall, indoor solar cells are no longer only auxiliary components for replacing conventional batteries; they are

becoming key energy modules that extend device lifetime, reduce maintenance frequency, and improve the intelligent user experience of IoT terminals.
