Indoor sweepers are specialized cleaning machines designed for efficient and thorough cleaning of indoor spaces. They are commonly used in commercial buildings, warehouses, factories, and other indoor environments where dirt, dust, debris, and small particles accumulate.

Indoor sweepers are equipped with rotating brushes or brooms that effectively sweep up dirt, dust, debris, and small particles from various floor surfaces. Some models also incorporate additional features such as vacuum suction, filtering systems, or dust control mechanisms to capture fine particles and prevent them from being released back into the air, thereby improving indoor air quality.
