Induction furnace is an electrical furnace that facilitates melting of metal using induction heating. It is an energy-efficient and easily-controlled melting process, based on the heating effect of the electromagnetic field.

A typical induction furnace comprises inductor coil, shell, crucible, and cooling system, and a tilting mechanism for pouring the molten metal. The inductor coil generates magnetic flux as alternating current passes through it. It is the magnetic flux that creates the heating effect inside the furnace.

Asia-Pacific held a key market revenue share of the linear motor market in 2019 which account for 66.26%. In 2019, OTTO JUNKER, Inductotherm Group, ABP Induction

Systems ranked top 3 of the revenue share in global market. These companies will witness a stable growth in the following five years.
