The global Induction Sealers market size is predicted to grow from US\$ 133 million in 2025 to US\$ 178 million in 2031; it is expected to grow at a CAGR of 5.0% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Induction sealing, also known as cap sealing, hermetically seals the tops of glass and plastic containers by heating an inner seal. After filling and capping, these induction sealers seal the aluminum laminated lining to the top (bung hole) of plastic or glass containers.

Induction Sealing Machines are machines finishing induction sealing.

Asia-Pacific is the largest consumption region, followed by North America and Europe.
