The global Industrial API Pumps market size is predicted to grow from US$ 1906 million in 2025 to US$ 2477 million in 2031; it is expected to grow at a CAGR of 4.5% from 2025 to 2031.

API pumps meet Standard 610 for General Refinery Service as set by the American Petroleum Institute (API). This U.S. trade association for the oil and natural gas industries develops standards for petroleum and petrochemical equipment. Unlike the ANSI standards, which are dimensional, API Standard 610 centers around the pump’s construction and design, particularly as they pertain to the pump’s ability to handle high temperatures, pressures and emissions.

Global key manufacturers of API pumps include KSB, Ruhrpumpen, PSG Dover etc. The top 3 companies hold a share about 30%. North America is the largest market, with a share about 28%, followed by Europe and Asia-Pacific with the share about 21% and 12%. In terms of product, overhung pump is the largest segment, with a share over 50%. And in terms of application, the largest application is oil and gas, followed by chemical.
