The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Industrial Branding Labels market size was valued at US$ 23180 million in 2023. With growing demand in downstream market, the Industrial Branding Labels is forecast to a readjusted size of US$ 33250 million by 2030 with a CAGR of 5.3% during review period.

The research report highlights the growth potential of the global Industrial Branding Labels market. Industrial Branding Labels are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Industrial Branding Labels. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Industrial Branding Labels market.

The primary use of an industrial label is to identify equipment and provide visual or textual information regarding use or risks. They can be used to keep track of products across the supply chain where it is not aesthetics but moisture, temperature, or chemical resistance that takes priority.

Warning/safety labels are expected to increase along with construction, food, beverage, and automotive industries due to supportive government regulations. Labels and packaging will continue to form the supply chain of essential goods and provide important tools for delivering messages and enhancing brands. The healthcare, pharmaceutical, and food and beverage industries will continue to be future growth areas for industrial label and package printing.
