Industrial coupling is a component that connects two shafts axially and transmits torque and motion. It has a certain ability to compensate for the deviation of the two shafts. In order to reduce the vibration of the mechanical transmission system and reduce the impact peak load, the coupling should also have Certain cushioning and shock absorption performance. The coupling sometimes also has an overload safety protection function.

Global Industrial Coupling key players include Rexnord Corporation, Renold, Martin, KTR Systems, Lovejoy, etc.

In terms of product, Snake Spring Coupling is the largest segment, with a share over 27%. And in terms of application, the largest application is Oil and Gas, followed by Food Processing, etc.
