An industrial borescope camera is used to see in walls, inspect pipes and see inside engines. A borescope inspection is performed in automotive, HVAC, plumbing and machine maintenance and repair, because an industrial borescope camera allows for the nondestructive inspection of hard-to-reach places such as drains, sewer pipes, heating vents, air ducts, furnaces, motors, pistons, gears, valves, compressors, boilers and condenser tubes. Thanks to flexible cables and lightweight enclosures, borescope cameras are extremely agile and mobile. Overview of Borescope An industrial borescope inspection camera helps the user locate potential problems quickly and easily without the need to dismantle a system or machine, allowing corrective measures to be taken before costly downtime occurs.

A video industrial borescope is used by industrial quality control professionals as well as by mechanics, plumbers, pipefitters, electricians, engineers, building inspectors,

security and law enforcement officers, locksmiths, and heating, ventilation and air conditioning (HVAC) technicians. A borescope is the ideal tool for practical applications such as investigating the internal components of a larger mechanism. In addition, a borescope is used for research in schools and universities.

Global Industrial Endoscope main players are Olympus, GE, Karl Storz, SKF, etc. Global top three manufacturers hold a share over 70%. Europe is the largest market, with a share nearly 30%.
