Ammonia solution, also known as ammonia water, ammoniacal liquor, ammonia liquor, aqua ammonia, aqueous ammonia, or (inaccurately) ammonia, is a solution of ammonia in water. It can be denoted by the symbols $\text{NH}_3(\text{aq})$. It is sometimes thought of as a solution of ammonium hydroxide. Although the name ammonium hydroxide suggests an alkali with composition $[\text{NH}_4^+][\text{OH}^-]$, it is actually impossible to isolate samples of NH_4OH . The ions NH_4^+ and OH^- do not account for a significant fraction of the total amount of ammonia except in extremely dilute solutions.
