The global Industrial Grade Red Phosphorus market size is predicted to grow from US\$ 7.35 million in 2025 to US\$ 7.46 million in 2032; it is expected to grow at a CAGR of 0.2% from 2026 to 2032.

Industrial red phosphorus refers to red phosphorus products specifically used in the field of industrial production. Red phosphorus is an allotrope of phosphorus with a stable molecular structure and low chemical reactivity, which makes it widely used in various industrial and scientific fields. Industrial red phosphorus usually appears as a purple-red or slightly brown amorphous powder with a glossy appearance and high density. It is insoluble in water but slightly soluble in anhydrous ethanol. Its melting point and boiling point are relatively high, about 590° and 760° respectively. These physical properties make industrial red phosphorus stable and controllable during processing and use. Industrial red phosphorus is mainly used to make flame retardants, safety matches, pesticides and other industrial uses.

United States market for Industrial Grade Red Phosphorus is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
