The global Industrial Induction Motor market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

Most industrial facilities use induction motors due to their reliability and desirable characteristics such as low cost and affordability, and most industrial motors are three-phase AC induction motors.

The global induction motor market has now been spread into North America, Europe, Asia Pacific, Latin America, and the Middle East and Africa. The Asia-Pacific region is expected to dominate the induction motor market. The high increase in the number of manufacturing and industrial units has boosted demand for induction motor. The induction motors are used in fans, blowers, machine tools, compressors, pumps, conveyors, bulldozers, etc. The increase in railways, metros, bullet trains, etc. requires the use of induction motor for stable and reliable operation. The rural economy which primarily depends on agricultural-related processes uses induction motors for several numbers of processes. Rapid urbanization has increased demand for elevators and escalators which in-turn has increased demand for induction motor.
