The global Industrial IR Thermometers market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Industrial/Environmental IR thermometers measure surface temperatures over an extensive temperature range to suit a multitude of industrial applications. Temperature measured in this category of thermometers can range from -60 to over 500°C. The extent of this range means there is a trade-off in measurement accuracy. Industrial/environmental IR thermometers have an error factor that averages around ±1 to 1.5°C, which is more than satisfactory for the majority of industrial/environmental applications.

United States market for Industrial IR Thermometers is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
