## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

An industrial magnetic reed switch is a type of electrical switch commonly used in industrial applications to detect the presence or absence of a magnetic field. It consists of two ferromagnetic contacts (reeds) sealed within a glass tube or encapsulated in a protective housing. When a magnetic field is applied to the vicinity of the switch, the reeds attract to each other, completing an electrical circuit. When the magnetic field is removed, the reeds return to their original position, breaking the circuit.

The global Industrial Magnetic Reed Switch market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
