The global Industrial Ozone Sterilizer market size is predicted to grow from US\$ 1209 million in 2025 to US\$ 1656 million in 2031; it is expected to grow at a CAGR of 5.4% from 2025 to 2031.

Ozone sterilizer, namely ozone generator, is a device that produces ozone gas, which is then released into an area containing either air or water to kill microorganisms and remove odors. ozone disinfection machines are used to purify air or water, destroying bacteria and removing many undesirable substances. Often, they use high-voltage electricity to produce ozone.

The industrial ozone sterilizer market had been experiencing growth due to increasing awareness about the drawbacks of traditional chemical disinfection methods, such as chlorine, and the demand for more environmentally friendly and efficient disinfection solutions.
