The global Industrial PDA Handheld Terminal market size is predicted to grow from US\$ 2886 million in 2025 to US\$ 4274 million in 2032; it is expected to grow at a CAGR of 5.9% from 2026 to 2032.

Common PDA terminals include barcode scanners, RFID readers, etc. Compared with ordinary PDA products, industrial-grade PDA handheld terminals are more suitable for industrial scenarios. During use, equipment loss due to environmental reasons is inevitable. Consumer PDAs, such as mobile phones, are fragile and not waterproof. In contrast, industrial PDA handheld terminals have higher stability. Global sales in 2024 will be approximately 10 million units, and the average unit price in 2024 will be approximately US\$280.

The industrial-grade handheld PDA terminal market is in a steady development stage. Its products are characterized by durability, stable performance and multi-functions. They can meet the needs of data collection, real-time communication and business processing in complex environments. They are widely used in logistics warehousing, retail trade, transportation, manufacturing, public utilities and medical industries, promoting the digital and intelligent transformation of enterprises. At the same time, with the popularization of the Internet of Things and 5G, the industry's demand for efficient, portable and secure data terminals continues to grow, and market competition is gradually shifting from pure hardware performance to a competition of comprehensive solutions and service capabilities.
