The global Industrial PoE Gigabit Switch market size is predicted to grow from US\$ 472 million in 2025 to US\$ 630 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

In 2025, global Industrial PoE Gigabit Switch production reached approximately 4,030 k units with an average global market price of around US\$ 120 per unit, and a gross profit margin of approximately 10%-30%. An industrial PoE gigabit switch is a hardened Ethernet switch designed to provide 10/100/1000 Mbps connectivity while delivering Power over Ethernet to field devices. Unlike office-grade PoE switches, industrial models are built for wider operating temperatures, shock and vibration, electrical noise, and higher surge/ESD exposure, often using metal enclosures, conformal coating options, redundant DC power inputs, and DIN-rail mounting for control panels. They typically support IEEE 802.3af/at (and sometimes 802.3bt) to power IP cameras, wireless access points, VoIP/intercom endpoints, sensors, and industrial gateways over a single cable, simplifying installation and reducing separate power wiring. Even when “unmanaged,” many industrial PoE gigabit switches include practical resilience features such as PoE watchdog/auto-restart, port power scheduling, extended-range PoE modes, alarm relays, and high MTBF thermal design; managed variants add VLAN, QoS, ring redundancy protocols, and security controls for deterministic industrial networks.

United States market for Industrial PoE Gigabit Switch is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Industrial PoE Gigabit Switch is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Industrial PoE Gigabit Switch is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
