Radio control (often abbreviated to R/C or simply RC) is the use of radio signals to remotely control a device. Radio control is used for control of model vehicles from a hand-held radio transmitter. Industrial, military, and scientific research organizations make use of radio-controlled vehicles as well. Today radio control is used in industry for such devices as overhead cranes and switchyard locomotives. Radio-controlled teleoperators are used for such purposes as inspections, and special vehicles for disarming of bombs. Some remotely controlled devices are loosely called robots, but are more properly categorized as teleoperators since they do not operate autonomously, but only under control of a human operator.

In the industry, HBC-radiomatic profits most in 2019 and recent years, while Cattron and Scanreco ranked 2 and 3. The market share for the top three players are 13.7%, 10.4% and 7.3% in 2019. The gap of market share is keep on enlarging due to different strategy.
