The global Industrial Safety Relay market size is predicted to grow from US$ 303 million in 2025 to US$ 375 million in 2031; it is expected to grow at a CAGR of 3.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

An industrial safety relay is an electromechanical or solid-state device used in industrial control systems to monitor and ensure the safe operation of machines and equipment. It is specifically designed to perform safety functions—such as emergency stop, safety door monitoring, and light curtain integration—by reliably interrupting power or signals when hazardous conditions are detected. Safety relays are compliant with international safety standards (e.g., ISO 13849, IEC 61508) and are essential in achieving functional safety in automation systems.

Global core safety relays manufacturers include Omron, Pilz and Rockwell Automation etc. The top 3 companies hold a share about 30%. Asia Pacific is the largest market, with a share about 43%, followed by Europe and North America with the share about 27% and 18%.
