The global Industrial Sodium Pyrophosphate market size is predicted to grow from US\$ 69.06 million in 2025 to US\$ 93.68 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

In 2025, global sales of industrial sodium pyrophosphate are projected to reach approximately 100,000 tons, with an average selling price of US\$700 per ton. Industrial sodium pyrophosphate is a chemical commonly used in water treatment, cleaning agents, ceramic production, and the food industry. Its main raw materials include phosphoric acid and sodium hydroxide, formed through a high-temperature polymerization reaction. The production process requires sophisticated equipment, thus total production capacity is limited by technological capabilities and equipment investment. The main supply chain involves the supply of phosphate rock resources and the production capacity of chemical processing plants. Downstream suppliers include water treatment plants, the fertilizer industry, the ceramic manufacturing industry, and cleaning product manufacturers, whose demand directly impacts the market development of sodium pyrophosphate. In particular, with stricter environmental standards and increased requirements for wastewater treatment efficiency, the application of industrial sodium pyrophosphate in water treatment is gradually expanding, driving market growth. Furthermore, the continuous development of the ceramic industry and the increasing demand for various cleaning products also provide stable demand support for this product. Looking ahead, with the promotion of green and environmentally friendly technologies and the increasing demand for sustainable development, the production process of sodium pyrophosphate will move towards low energy consumption and low emissions. Currently, most global production capacity is concentrated in Asia, especially China, and its dominant position is expected to remain. Furthermore, due to the wide application of the product in cleaning agents and water

treatment, demand in this market is expected to continue to grow in the coming years, especially in developing countries.

United States market for Industrial Sodium Pyrophosphate is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
