The global Industrial Spiral Brush Roller market size is predicted to grow from US\$ 68.56 million in 2025 to US\$ 106 million in 2032; it is expected to grow at a CAGR of 6.6% from 2026 to 2032.

In 2025, global production of industrial spiral brush rollers reached 960,000 meters, with an estimated average selling price of \$73 per meter. Industrial spiral brush rollers typically use a metal shaft, aluminum alloy cylinder, PVC/PP/nylon roller core, or stainless steel core as the base. Brush filaments, steel strips, or brush blades are wound, pressed, welded, or modularly spliced onto the roller core surface along a spiral trajectory, forming a continuous or segmented spiral bristle working surface. They are mainly used for sweeping, cleaning, conveyor assistance, dust removal, deburring, polishing, guiding, chip removal, water removal, and surface treatment processes. The spiral structure offers smoother chip and water drainage, more continuous contact, lower operating resistance, easier segmented bristle replacement, and suitability for long rollers and high-speed production lines. They are particularly suitable for conveyor belt cleaning, road sweeping, food and beverage processing, printing, mining, metal processing, and industrial automation. The upstream mainly includes PA/PP/PBT/PET brush filaments, abrasive filaments, stainless steel wire, carbon steel wire, copper wire, steel strip, aluminum alloy profiles, steel shafts, plastic roller cores, adhesives, end caps, and machined parts; the midstream includes brush filament selection, steel strip clamping, spiral winding, roller core processing, cutting and assembly, dynamic balancing testing, dimensional calibration, and non-standard customization; the downstream mainly serves industrial equipment manufacturers, conveyor equipment manufacturers, road cleaning equipment manufacturers, food and beverage equipment manufacturers, mining machinery manufacturers, glass and photovoltaic equipment manufacturers, metal processing lines, packaging and printing equipment

manufacturers, MRO industrial consumables channels, and end-user factories. Gross profit margin is approximately 20%-45%.
