Pressure relief valves are used in drilling and workover operations in the oil and gas industry, which in turn increases the demand for pressure relief valves and is expected to drive the growth of the pressure relief valves market. Total investment in oil and gas infrastructure is expected to be between \$685 billion and \$895 billion from 2018 to 2035, according to the June 2018 North American Midstream Infrastructure to 2035 report by ICF International Inc. In developing countries including the European Union, such as the United States and China, the beverage industry is basically saturated. Pressure relief valves are playing an important role in the manufacture of different types of medical devices and supporting key players in delivering opportunities amidst this pandemic situation. For example, according to India Brand Equity Foundation (IBEF), the food and beverage processing industry has become a highly profitable and high-growth industry due to its huge growth potential. Moreover, increasing number of industrial infrastructure projects in developing countries is driving the demand for pressure relief valves market. Emerging economies such as India, China, and Egypt are increasing investments in hydrocarbon projects for more oil and gas exploration, which is expected to provide lucrative opportunities for the growth of the pressure relief valve market. Rising demand for petroleum and other energy sources as well as renewable resources is expected to drive the growth of the pressure relief valve market. The Egyptian government is investing around \$2.5 billion in new refinery projects to process hydrocarbons. All these scenarios are expected to provide lucrative opportunities for the growth of the pressure relief valves market.
