Industrial tapes are used for binding purpose in various industrial operations. Industrial tapes offer high level of adhesive strength compared to normal tapes which are used in everyday life. Heavy materials and spare parts cannot be attached using normal tapes as these materials require high level of adhesive bonding. Industrial tapes are used for attaching various components such as cushions, foams and lighting fixtures. Bonding operations such as concrete bonding, glass bonding and floor bonding are carried out

using industrial tapes. Also, industrial tapes are finding increasing adoption in operations such as vehicle assembly, electronic components assembly, heating ventilation air conditioning (HVAC) operations, insulation and packaging. Industrial tapes are increasingly used for permanent or temporary assembly and fabrication of products and components. Further, industrial tapes are water resistant and shock resistant for specific operations such as electrical equipment manufacturing. Industrial tapes can be used in harsh conditions such as extremely high and cold temperatures, ultraviolet light and solvents.
