Industrial yarn refers to a specialized type of yarn designed and manufactured for use in various industrial applications, such as textile production, manufacturing processes, and technical applications that require durable, high-strength, and resilient yarn materials. Industrial yarns are produced from a variety of synthetic or natural fibers, depending on the specific requirements of the intended industrial application, and are engineered to meet stringent performance criteria, including tensile strength, abrasion resistance, and chemical resilience, to ensure optimal performance and reliability in demanding industrial environments.

Manufacturers were witnessing a rise in demand for sustainable and recyclable yarn materials, prompting the development of eco-friendly industrial yarns made from recycled fibers, biodegradable polymers, and renewable materials, to support circular economy initiatives, reduce carbon footprints, and promote environmentally responsible manufacturing practices in alignment with global sustainability goals and industry best practices.
