Inflatable cable duct sealing bag is a product specially used for waterproof sealing of cable ducts. It is composed of soft metal and multi-layer polymer materials to form a sealed air bag with waterproof films that can withstand high temperatures on both sides. When the inflation reaches a certain pressure, the waterproof films on both sides will fit tightly between the pipe and the cable to achieve complete waterproofing. Inflatable cable duct sealing bags have the advantages of easy installation, good sealing effect, isolation of harmful external substances, withstand environmental vibration and wear, and prevention of damage by small animals. They are widely used in the fields of electric power, communications, and urban construction.
