The global Initiator EHP market size is predicted to grow from US\$ 60.94 million in 2025 to US\$ 81.79 million in 2032; it is expected to grow at a CAGR of 4.4% from 2026 to 2032.

Initiator EHP (CAS No.: 16111-62-9) is a significant organic peroxide free-radical initiator. It decomposes upon heating to generate free radicals; at room temperature, it exists as a colorless, transparent liquid. It is primarily utilized in the polymer materials industry to initiate the polymerization of various monomers (such as vinyl chloride, vinyl acetate, etc.).

Key upstream raw materials include 2-ethylhexanol, phosgene (or 2-ethylhexyl chloroformate), hydrogen peroxide, and sodium hydroxide. Traditional manufacturing processes typically involve first synthesizing 2-ethylhexyl chloroformate from 2-ethylhexanol and phosgene, followed by a reaction with hydrogen peroxide and a base to produce EHP. Given that the peroxidation reaction is exothermic and the product exhibits relatively low thermal stability, quality control is a critical priority across all stages—including production, dilution, emulsification, packaging, and cold-chain storage and transportation. Downstream applications primarily involve polymerization systems for materials such as PVC, LDPE, EVA, polyvinylidene chloride resins, acrylates, and methacrylates.

In 2025, global sales volume for Initiator EHP is projected to reach approximately 7,000 tons, with an average global market price of approximately \$8,500 per ton. The gross profit margins for major manufacturers within the industry are expected to range between 30% and 45%.

United States market for Initiator EHP is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Initiator EHP is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Initiator EHP is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
