The global Insulating Glass Units market size is predicted to grow from US\$ 36480 million in 2025 to US\$ 39290 million in 2031; it is expected to grow at a CAGR of 1.2% from 2025 to 2031.

Insulating glass units, or IGUs, are designed to keep homes warmer in colder weather and cooler in warmer weather. An insulating glass unit commonly consists of two (sometimes more) panes of glass separated by a spacer material and sealed together at the edge. The insulating airspace is filled with air or a noble gas, such as argon or krypton inside, and some IGUs may be coated with special materials. This enables the glass to meet two very different requirements, keeping heat in during colder weather and keeping heat out during warmer weather.

Global Insulating Glass Units key players include CSG HOLDING, Yaohua Pilkington Glass, AGC, JIN JING GROUP, etc.

China is the largest market, with a share over 50%, followed by Europe, and NAM, both have a share about 30 percent.

In terms of product, Conventional Insulating Glass Units is the largest segment, with a share nearly 55%. And in terms of application, the largest application is Non-structural applications, followed by Structural glazing applications.
