In traditional sites, construction for new cabinet includes soil removal, excavation, pouring concrete, forming, grounding, and time consuming processes to prepare shelters. Expenses of organizations are increasing due to climate control and maintenance cost of the concrete shelters. Solution providers are offering cost effective solutions to businesses by providing integrated platform deployment solutions (IPDS) which reduces the maintenance cost of companies. The integrated platform deployment solution (IPDS) also helps to reduce the shelter cost and installation time of shelters for site operation. IPDS are tested and equipped with all the necessary equipment which is important for site operations.
