The global Integrated SIM (iSIM) market size is predicted to grow from US\$ 8.1 million in 2025 to US\$ 15.7 million in 2031; it is expected to grow at a CAGR of 11.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The iSIM, also known as integrated Universal Integrated Circuit Card (iUICC), is the next phase of SIM solution technology. Smaller, cost-efficient, and with more flexibility and sustainability than earlier SIM generations, it has the potential to revolutionize the market for connected IoT devices and technology. Unlike removable SIM cards, which are set into plastic housings, or eSIMs, which are soldered into the device, an iUICC is a tamper-resistant element (TRE) within a system-on-a-chip (SoC). Also known as an Integrated SIM (iSIM), iUICC is an isolated hardware component combined with a baseband chipset to create a single connectivity module. iUICC is the latest stage of the SIM evolution, and it offers a tremendous amount of potential and advantages for the IoT industry. Due to its small footprint and the low power requirements, it is a promising all-in-one connectivity solution, especially for the Narrowband Internet of Things (NB-IoT).

United States market for Integrated SIM (iSIM) is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Integrated SIM (iSIM) is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

Europe market for Integrated SIM (iSIM) is estimated to increase from US\$ million in

2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

Global key Integrated SIM (iSIM) players cover STMicroelectronics, NXP, Infineon, Guoxin Micro, CEC Huada Electronic Design Co., Ltd, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2024.
