Door handles are breeding grounds for bacteria, viruses and fungi. According to the Centers for Disease Control (CDC), some microbes can survive on doorknobs for hours, in some cases even days. Although people's healthy and hygienic habits have made great progress, touching the door handle often is still a weak link, which may destroy all the hard work.

The intelligent door handle can effectively complete the disinfection process. It includes two categories: self disinfection door handle and hand disinfection door handle.
