Abstracts

The global Intelligent Dual Flow Solenoid Valve market size is predicted to grow from US\$ 112 million in 2025 to US\$ 150 million in 2032; it is expected to grow at a CAGR of 3.4% from 2026 to 2032.

In 2025, the global output of intelligent dual flow solenoid valves reached 766,000 units, with an average selling price of \$150 per unit. In 2025, the global production capacity of intelligent dual flow solenoid valves was about 1.2 million units, and the gross margin was about 25.2%. An intelligent dual flow solenoid valve is an automated device used to control fluid flow, particularly suitable for systems that require precise control and monitoring of flow. This solenoid valve combines the functions of a solenoid valve and a flow meter, and can automatically open and close according to set conditions, enabling control and management of fluids (such as water, oil, or gas). The upstream of intelligent dual flow solenoid valve includes engineering plastics, metal materials, magnetic materials, etc. The midstream consists of intelligent dual flow solenoid valve manufacturers, and the downstream is mainly applied in industries such as chemical, food, and environmental protection.

The intelligent dual flow solenoid valve market is currently in a phase of steady development, driven by growing demand for automation and precise flow control across downstream industries. With the deep integration of industrial IoT and smart manufacturing, this product is evolving toward higher integration, remote monitoring, and adaptive control, with accelerated technological upgrades. Stricter environmental regulations and higher energy efficiency requirements are also prompting sectors such as chemical, food, and water treatment to accelerate the adoption of such intelligent valves. The competitive landscape is relatively fragmented, with technology and service capabilities becoming the key differentiators among manufacturers. Overall, the market

outlook is broad, though cost control and long-term reliability remain focal points of industry concern.
