The global Intelligent Rack PDU market size is predicted to grow from US\$ 2568 million in 2025 to US\$ 5522 million in 2032; it is expected to grow at a CAGR of 11.6% from 2026 to 2032.

An Intelligent Rack PDU (Power Distribution Unit) is a data center power device installed in server racks that distributes electrical power to multiple IT equipment (such as servers, switches, and storage devices) while providing real-time monitoring and remote management capabilities. It typically supports functions such as power metering, load balancing, environmental sensing, outlet-level control, and network-based remote switching. In 2025, global Intelligent Rack PDU production reached approximately 8.20 M units, with an average global market price of around US\$320 per unit. Annual production capacity is 9.15 M units. Gross Profit Margin: 38%. The Intelligent Rack PDU industry chain is structured across three main layers: upstream component suppliers, midstream manufacturers, and downstream end-users. Upstream includes electrical components such as copper busbars, circuit breakers, metering ICs, sensors, and network communication modules. Midstream is dominated by manufacturers like Schneider Electric, Eaton, Vertiv, and Delta Electronics, which design, assemble, and brand intelligent PDUs. Downstream demand mainly comes from hyperscale cloud data centers, AI/HPC infrastructure, colocation facilities, telecom edge sites, and enterprise IT rooms, where reliable and remotely manageable power distribution is critical. Intelligent Rack PDUs are evolving from simple power distribution hardware into software-enabled infrastructure nodes. The key value shift is no longer just electrical reliability, but real-time monitoring, energy optimization, and remote controllability in high-density computing environments. As AI workloads drive higher rack power density, PDUs are becoming strategic infrastructure components rather than passive accessories. In my view, future competition will increasingly depend on software integration, energy intelligence, and system-level ecosystem control rather than purely electrical specifications.

United States market for Intelligent Rack PDU is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Intelligent Rack PDU is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Intelligent Rack PDU is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Intelligent Rack PDU players cover Schneider Electric, Eaton Corporation, Vertiv Group Corp, ABB Ltd, Legrand SA, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
