Wood stain is a type of paint used to colour wood.

Wood stain consists of colourants dissolved and/or suspended in a 'vehicle' or solvent. Vehicle is the preferred term, as the contents of a stain may not be truly dissolved in the vehicle, but rather suspended, and thus the vehicle may not be a true solvent. The vehicle often may be water, alcohol, a petroleum distillate, or a finishing agent such as shellac, lacquer, varnish and polyurethane. Coloured or stained finishes do not typically deeply penetrate the pores of the wood and may largely disappear when the finish deteriorates or is removed.

In North America, Interior Stain key players include Sherwin-Williams, PPG, Cabot, RPM International, United Gilsonite Laboratories, etc. The top five manufacturers hold a share over 70%.
