Interventional radiology is a medical specialty which provides minimally invasive image-guided diagnosis and treatment of disease.

The arsenal of an interventional radiologist (IR) consists of a variety of equipment that is essential for both diagnostic and therapeutic procedures. Common imaging modalities used include fluoroscopy, ultrasound, computed tomography, and magnetic resonance imaging. The fundamental endovascular equipment includes guidewires and catheters, but a slew of other endovascular devices may be utilized during a given procedure. Guidewires may differ in length, diameter, stiffness, and coating. The 3 common types of guidewires are starter wires, selective, and exchange. Catheters come in many
