Abstracts

The global Intradental-Intraosseous Implants market size is predicted to grow from US\$ 4542 million in 2025 to US\$ 6672 million in 2032; it is expected to grow at a CAGR of 5.9% from 2026 to 2032.

Intradental-Intraosseous Implants are surgically placed dental implant devices designed to achieve direct anchorage within the maxillary or mandibular bone and provide stable support for prosthetic tooth replacement. The product typically consists of a threaded or shaped implant body manufactured from commercially pure titanium, titanium alloy, titanium-zirconium alloy, or zirconia, with surface characteristics engineered to support osseointegration. Product configurations vary by body geometry, diameter, length, implant–abutment connection, placement level, healing protocol, and loading strategy. The research scope covers bone-level and tissue-level systems, one-piece and two-piece structures, tapered and parallel-walled designs, conventional root-form implants, short and narrow-diameter implants, and specialized solutions such as wide-diameter and zygomatic implants. Intradental-Intraosseous Implants are used in single-tooth replacement, multiple-tooth rehabilitation, implant-supported bridges, overdentures, full-arch fixed restoration, immediate placement, esthetic-zone treatment, posterior restoration, and rehabilitation of patients with reduced jawbone volume.

Key Findings

In 2025, global Intradental-Intraosseous Implants production reached approximately 23.22 million units. The average gross profit margin of this product is 75%

Titanium-based implants remain the principal product category

Two-piece implant systems dominate routine clinical treatment

Bone-level designs support broad restorative flexibility

Digital workflows are reshaping implant treatment delivery

Immediate protocols drive demand for higher primary stability

Full-arch rehabilitation represents a high-value application

Market Trends

The Intradental-Intraosseous Implants market is shifting from individual implant components toward integrated treatment systems combining implant bodies, prosthetic connections, surgical instruments, biomaterials, digital planning software, guided surgery, intraoral scanning, and CAD/CAM restoration. Product development increasingly focuses on primary stability, reduced treatment time, simplified restorative procedures, soft-tissue management, and compatibility across multiple clinical indications. Bone-level and tissue-level designs continue to serve different surgical and restorative preferences, while broader diameter, length, body-shape, and connection portfolios enable clinicians to treat limited vertical bone, narrow interdental spaces, extraction sockets, sloped ridges, and severely resorbed jaws. Official product portfolios also demonstrate a clear movement toward integrated digital workflows and standardized prosthetic platforms that reduce inventory complexity and improve procedural consistency.

Market Dynamics

Drivers

Demand for Intradental-Intraosseous Implants is supported by the continuing need to restore missing teeth, improve chewing function, preserve facial and dental aesthetics, and provide fixed or removable implant-supported rehabilitation. Expansion of implant dentistry training, greater availability of digital diagnostic and surgical technologies, and broader clinical adoption in general dental practices are increasing treatment accessibility. Product innovation in implant surface treatment, thread geometry, tapered body design, and implant–abutment connections is also improving the ability of clinicians to manage complex anatomical conditions and select immediate, early, or conventional loading protocols according to patient-specific stability.

Restraints

Market development remains constrained by the total cost of implant treatment, differences in reimbursement and patient affordability, and the need for trained clinicians, appropriate imaging, surgical infrastructure, and long-term maintenance. Clinical suitability depends on bone quality, bone volume, systemic health, oral hygiene, smoking status, and occlusal conditions, which limits universal adoption. Complex cases may require bone augmentation, soft-tissue management, or specialized implants, increasing procedural cost and treatment risk. The wide variety of proprietary connections and restorative components can also create inventory, training, and compatibility burdens for dental clinics and laboratories.

Opportunities

Major opportunities lie in solutions that expand implant treatment to patients with limited bone volume or more demanding restorative conditions. Short, narrow-diameter, wide-diameter, and zygomatic implant configurations can reduce dependence on extensive augmentation in selected cases, while high-stability tapered implants support immediate-placement and immediate-loading workflows when clinical conditions are appropriate. Further opportunities are emerging from digitally guided surgery, patient-specific prosthetics, chairside and laboratory CAD/CAM production, standardized restorative interfaces, and full-arch treatment concepts. The integration of surgical planning, implant placement, provisional restoration, and definitive prosthetic delivery creates additional value beyond the implant body itself.

Challenges

Long-term market development depends on maintaining predictable clinical outcomes while shortening treatment cycles and broadening indications. Manufacturers must balance aggressive thread designs and high insertion torque with protection of peri-implant bone and soft tissue. They must also demonstrate reliable compatibility among implant bodies, abutments, instruments, digital libraries, and restorative workflows. Other challenges include regulatory requirements, clinical evidence generation, practitioner loyalty to established systems, price competition, counterfeit or non-compatible components, and the need to support extensive product inventories without weakening supply reliability or after-sales service.

Industry Chain Analysis

The upstream chain of Intradental-Intraosseous Implants consists primarily of medical-

grade titanium, titanium alloys, titanium-zirconium materials, zirconia ceramics, precision machining equipment, surface-treatment technologies, sterile packaging materials, and quality-control systems. Material purity, fatigue strength, corrosion resistance, machining accuracy, surface topography, cleanliness, and sterilization consistency directly influence product performance and manufacturing cost. Zirconia products require specialized ceramic forming, sintering, finishing, and fracture-control capabilities, while titanium-based products depend heavily on high-precision turning, milling, blasting, etching, anodization, coating, and validated cleaning processes.

Midstream value creation is concentrated in implant design, connection engineering, surface modification, manufacturing validation, clinical documentation, regulatory registration, prosthetic-system development, and digital-workflow integration. Downstream channels include dental hospitals, specialist implant clinics, general dental practices, dental laboratories, surgeons, restorative dentists, and digital service providers. The implant fixture represents only one part of the treatment value chain; surgical kits, abutments, restorative components, guided-surgery tools, biomaterials, training, technical support, and laboratory workflows materially affect supplier differentiation and customer retention. Companies with integrated surgical, restorative, and digital ecosystems generally have stronger control over clinical workflow and recurring component demand.

Segment Insights

By material, commercially pure titanium and titanium alloy implants form the core of the market because of their established clinical use, mechanical properties, processing maturity, and broad prosthetic compatibility. Titanium-zirconium alloy products address applications requiring reduced implant diameter while maintaining mechanical performance, whereas zirconia implants serve a more specialized segment associated with metal-free treatment preferences and esthetic considerations. The commercial opportunity for zirconia depends on continued improvement in fracture resistance, component flexibility, restorative options, and clinician familiarity.

By structure and clinical design, two-piece implants account for the larger share because they allow separate selection of implant bodies, abutments, emergence profiles, and restorative components. One-piece implants offer procedural simplicity in selected indications but provide less prosthetic flexibility. Bone-level implants support versatile emergence-profile management and esthetic restoration, while tissue-level implants are positioned around simplified one-stage surgery and transgingival healing.

Tapered implants, internal conical connections, short implants, narrow-diameter implants, and immediate-protocol designs represent important development directions because they address stability, anatomical limitations, and treatment-efficiency requirements.

Downstream Market Opportunities

Single-tooth replacement and partially edentulous restoration provide the broadest clinical demand base, supported by repeatable treatment workflows and extensive restorative options. Full-arch fixed restoration and implant-supported overdentures offer higher treatment value because they combine multiple implants, multi-unit prosthetic components, digital planning, provisionalization, and laboratory services. Additional opportunities are found in immediate post-extraction placement, anterior esthetic restoration, posterior loading, rehabilitation of atrophic jaws, and zygomatic implant treatment for severe maxillary bone loss. Suppliers able to support both routine and complex cases through coordinated surgical and restorative systems can address a wider range of clinical customers.

Regional Insights

North America and Europe represent established markets characterized by mature specialist networks, broad access to advanced restorative technologies, strong clinical education systems, and high adoption of digital dentistry. Demand in these regions is increasingly linked to workflow efficiency, immediate treatment concepts, premium restorative outcomes, and integration between implant systems and digital platforms. Competition is based not only on implant design but also on clinical documentation, practitioner education, laboratory compatibility, technical service, and the breadth of restorative components.

Asia-Pacific offers substantial development potential due to its large population base, expanding dental-care capacity, increasing numbers of trained implant clinicians, and growing demand for functional and esthetic tooth replacement. Regional markets differ considerably in treatment affordability, insurance coverage, local manufacturing capability, regulatory requirements, and clinic structure. China and South Korea have developed active implant markets supported by domestic and international manufacturers, while other emerging markets continue to depend on specialist centers and imported systems. Future regional expansion will increasingly favor suppliers that combine competitive pricing with clinician education, reliable distribution, regulatory compliance, and locally adapted product portfolios.

Competitive Landscape Analysis

The Intradental-Intraosseous Implants market has a diversified competitive structure comprising global integrated dental groups, specialized implant manufacturers, regional brands, and emerging local producers. Established international companies compete through long-term clinical documentation, proprietary implant–abutment connections, advanced surface technologies, extensive diameter and length portfolios, comprehensive prosthetic components, digital planning tools, guided-surgery systems, and professional education networks. Korean manufacturers have strengthened their market position through broad product coverage, competitive pricing, training programs, and extensive distribution, while European, American, Israeli, Japanese, South African, and Chinese suppliers occupy differentiated positions across premium, specialist, and value-oriented segments. Competitive advantage increasingly depends on the ability to provide a complete treatment ecosystem rather than an isolated implant fixture. Product reliability and clinical evidence remain fundamental, but inventory simplification, cross-product compatibility, digital integration, restorative flexibility, local regulatory execution, clinician training, and after-sales support are becoming equally important determinants of long-term customer retention.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Intradental-Intraosseous Implants Industry Forecast” looks at past sales and reviews total world Intradental-Intraosseous Implants sales in 2025, providing a comprehensive analysis by region and market sector of projected Intradental-Intraosseous Implants sales for 2026 through 2032. With Intradental-Intraosseous Implants sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Intradental-Intraosseous Implants industry.

This Insight Report provides a comprehensive analysis of the global Intradental-Intraosseous Implants landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Intradental-Intraosseous Implants portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Intradental-Intraosseous Implants market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Intradental-Intraosseous Implants and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging

pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Intradental-Intraosseous Implants.

This report presents a comprehensive overview, market shares, and growth opportunities of Intradental-Intraosseous Implants market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Titanium Implant

Zirconia Implant

Other

Segmentation by Replacement:

Single-Tooth Replacement

Multiple-Tooth Replacement

Full-Arch Rehabilitation

Segmentation by Shape:

Cylindrical Implant

Tapered Implant

Other

Segmentation by Application:

Hospital

Dental Clinic

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Straumann

Envista

Dentsply Sirona

ZimVie

Osstem

Henry Schein

Dentium

GC

DIO

Neobiotech

Kyocera Medical

Southern Implant

Keystone Dental

Bicon

BEGO

B & B Dental

Dyna Dental

Huaxi Dental Implant

Bioconcept

Trausim

Key Questions Addressed in this Report

What is the 10-year outlook for the global Intradental-Intraosseous Implants market?

What factors are driving Intradental-Intraosseous Implants market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Intradental-Intraosseous Implants market opportunities vary by end market size?

How does Intradental-Intraosseous Implants break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Intradental-Intraosseous Implants Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Intradental-Intraosseous Implants by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Intradental-Intraosseous Implants by Country/Region, 2021, 2025 & 2032
- 2.2 Intradental-Intraosseous Implants Segment by Type
 - 2.2.1 Titanium Implant
 - 2.2.2 Zirconia Implant
 - 2.2.3 Other
 - 2.2.4 Intradental-Intraosseous Implants Sales by Type
 - 2.2.4.1 Global Intradental-Intraosseous Implants Sales Market Share by Type (2021-2026)
 - 2.2.4.2 Global Intradental-Intraosseous Implants Revenue and Market Share by Type (2021-2026)
 - 2.2.4.3 Global Intradental-Intraosseous Implants Sale Price by Type (2021-2026)
- 2.3 Intradental-Intraosseous Implants Segment by Replacement
 - 2.3.1 Single-Tooth Replacement
 - 2.3.2 Multiple-Tooth Replacement
 - 2.3.3 Full-Arch Rehabilitation
 - 2.3.4 Intradental-Intraosseous Implants Sales by Replacement
 - 2.3.4.1 Global Intradental-Intraosseous Implants Sales Market Share by Replacement (2021-2026)
 - 2.3.4.2 Global Intradental-Intraosseous Implants Revenue and Market Share by

Replacement (2021-2026)

2.3.4.3 Global Intradental-Intraosseous Implants Sale Price by Replacement (2021-2026)

2.4 Intradental-Intraosseous Implants Segment by Shape

2.4.1 Cylindrical Implant

2.4.2 Tapered Implant

2.4.3 Other

2.4.4 Intradental-Intraosseous Implants Sales by Shape

2.4.4.1 Global Intradental-Intraosseous Implants Sales Market Share by Shape (2021-2026)

2.4.4.2 Global Intradental-Intraosseous Implants Revenue and Market Share by Shape (2021-2026)

2.4.4.3 Global Intradental-Intraosseous Implants Sale Price by Shape (2021-2026)

2.5 Intradental-Intraosseous Implants Segment by Application

2.5.1 Hospital

2.5.2 Dental Clinic

2.5.3 Intradental-Intraosseous Implants Sales by Application

2.5.3.1 Global Intradental-Intraosseous Implants Sale Market Share by Application (2021-2026)

2.5.3.2 Global Intradental-Intraosseous Implants Revenue and Market Share by Application (2021-2026)

2.5.3.3 Global Intradental-Intraosseous Implants Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Intradental-Intraosseous Implants Breakdown Data by Company

3.1.1 Global Intradental-Intraosseous Implants Annual Sales by Company (2021-2026)

3.1.2 Global Intradental-Intraosseous Implants Sales Market Share by Company (2021-2026)

3.2 Global Intradental-Intraosseous Implants Annual Revenue by Company (2021-2026)

3.2.1 Global Intradental-Intraosseous Implants Revenue by Company (2021-2026)

3.2.2 Global Intradental-Intraosseous Implants Revenue Market Share by Company (2021-2026)

3.3 Global Intradental-Intraosseous Implants Sale Price by Company

3.4 Key Manufacturers Intradental-Intraosseous Implants Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Intradental-Intraosseous Implants Product Location Distribution

- 3.4.2 Players Intradental-Intraosseous Implants Products Offered
- 3.5 Market Concentration Rate Analysis
 - 3.5.1 Competition Landscape Analysis
 - 3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
- 3.6 New Products and Potential Entrants
- 3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR INTRADENTAL-INTRAOSSEOUS IMPLANTS BY GEOGRAPHIC REGION

- 4.1 World Historic Intradental-Intraosseous Implants Market Size by Geographic Region (2021-2026)
 - 4.1.1 Global Intradental-Intraosseous Implants Annual Sales by Geographic Region (2021-2026)
 - 4.1.2 Global Intradental-Intraosseous Implants Annual Revenue by Geographic Region (2021-2026)
- 4.2 World Historic Intradental-Intraosseous Implants Market Size by Country/Region (2021-2026)
 - 4.2.1 Global Intradental-Intraosseous Implants Annual Sales by Country/Region (2021-2026)
 - 4.2.2 Global Intradental-Intraosseous Implants Annual Revenue by Country/Region (2021-2026)
- 4.3 Americas Intradental-Intraosseous Implants Sales Growth
- 4.4 APAC Intradental-Intraosseous Implants Sales Growth
- 4.5 Europe Intradental-Intraosseous Implants Sales Growth
- 4.6 Middle East & Africa Intradental-Intraosseous Implants Sales Growth

5 AMERICAS

- 5.1 Americas Intradental-Intraosseous Implants Sales by Country
 - 5.1.1 Americas Intradental-Intraosseous Implants Sales by Country (2021-2026)
 - 5.1.2 Americas Intradental-Intraosseous Implants Revenue by Country (2021-2026)
- 5.2 Americas Intradental-Intraosseous Implants Sales by Type (2021-2026)
- 5.3 Americas Intradental-Intraosseous Implants Sales by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

6.1 APAC Intradental-Intraosseous Implants Sales by Region

6.1.1 APAC Intradental-Intraosseous Implants Sales by Region (2021-2026)

6.1.2 APAC Intradental-Intraosseous Implants Revenue by Region (2021-2026)

6.2 APAC Intradental-Intraosseous Implants Sales by Type (2021-2026)

6.3 APAC Intradental-Intraosseous Implants Sales by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe Intradental-Intraosseous Implants by Country

7.1.1 Europe Intradental-Intraosseous Implants Sales by Country (2021-2026)

7.1.2 Europe Intradental-Intraosseous Implants Revenue by Country (2021-2026)

7.2 Europe Intradental-Intraosseous Implants Sales by Type (2021-2026)

7.3 Europe Intradental-Intraosseous Implants Sales by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Intradental-Intraosseous Implants by Country

8.1.1 Middle East & Africa Intradental-Intraosseous Implants Sales by Country (2021-2026)

8.1.2 Middle East & Africa Intradental-Intraosseous Implants Revenue by Country (2021-2026)

8.2 Middle East & Africa Intradental-Intraosseous Implants Sales by Type (2021-2026)

8.3 Middle East & Africa Intradental-Intraosseous Implants Sales by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of Intradental-Intraosseous Implants

10.3 Manufacturing Process Analysis of Intradental-Intraosseous Implants

10.4 Industry Chain Structure of Intradental-Intraosseous Implants

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 Intradental-Intraosseous Implants Distributors

11.3 Intradental-Intraosseous Implants Customer

12 WORLD FORECAST REVIEW FOR INTRADENTAL-INTRAOSSEOUS IMPLANTS BY GEOGRAPHIC REGION

12.1 Global Intradental-Intraosseous Implants Market Size Forecast by Region

12.1.1 Global Intradental-Intraosseous Implants Forecast by Region (2027-2032)

12.1.2 Global Intradental-Intraosseous Implants Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global Intradental-Intraosseous Implants Forecast by Type (2027-2032)

12.7 Global Intradental-Intraosseous Implants Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 Straumann

13.1.1 Straumann Company Information

13.1.2 Straumann Intradental-Intraosseous Implants Product Portfolios and Specifications

13.1.3 Straumann Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)

13.1.4 Straumann Main Business Overview

13.1.5 Straumann Latest Developments

13.2 Envista

13.2.1 Envista Company Information

13.2.2 Envista Intradental-Intraosseous Implants Product Portfolios and Specifications

13.2.3 Envista Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)

13.2.4 Envista Main Business Overview

13.2.5 Envista Latest Developments

13.3 Dentsply Sirona

13.3.1 Dentsply Sirona Company Information

13.3.2 Dentsply Sirona Intradental-Intraosseous Implants Product Portfolios and Specifications

13.3.3 Dentsply Sirona Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)

13.3.4 Dentsply Sirona Main Business Overview

13.3.5 Dentsply Sirona Latest Developments

13.4 ZimVie

13.4.1 ZimVie Company Information

13.4.2 ZimVie Intradental-Intraosseous Implants Product Portfolios and Specifications

13.4.3 ZimVie Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)

13.4.4 ZimVie Main Business Overview

13.4.5 ZimVie Latest Developments

13.5 Osstem

13.5.1 Osstem Company Information

13.5.2 Osstem Intradental-Intraosseous Implants Product Portfolios and Specifications

13.5.3 Osstem Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)

13.5.4 Osstem Main Business Overview

- 13.5.5 Osstem Latest Developments
- 13.6 Henry Schein
 - 13.6.1 Henry Schein Company Information
 - 13.6.2 Henry Schein Intradental-Intraosseous Implants Product Portfolios and Specifications
 - 13.6.3 Henry Schein Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.6.4 Henry Schein Main Business Overview
 - 13.6.5 Henry Schein Latest Developments
- 13.7 Dentium
 - 13.7.1 Dentium Company Information
 - 13.7.2 Dentium Intradental-Intraosseous Implants Product Portfolios and Specifications
 - 13.7.3 Dentium Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.7.4 Dentium Main Business Overview
 - 13.7.5 Dentium Latest Developments
- 13.8 GC
 - 13.8.1 GC Company Information
 - 13.8.2 GC Intradental-Intraosseous Implants Product Portfolios and Specifications
 - 13.8.3 GC Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.8.4 GC Main Business Overview
 - 13.8.5 GC Latest Developments
- 13.9 DIO
 - 13.9.1 DIO Company Information
 - 13.9.2 DIO Intradental-Intraosseous Implants Product Portfolios and Specifications
 - 13.9.3 DIO Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.9.4 DIO Main Business Overview
 - 13.9.5 DIO Latest Developments
- 13.10 Neobiotech
 - 13.10.1 Neobiotech Company Information
 - 13.10.2 Neobiotech Intradental-Intraosseous Implants Product Portfolios and Specifications
 - 13.10.3 Neobiotech Intradental-Intraosseous Implants Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.10.4 Neobiotech Main Business Overview
 - 13.10.5 Neobiotech Latest Developments

13.11 Kyocera Medical

13.11.1 Kyocera Medical Company Information

13.11.2 Kyocera Medical Intradental-Intraosseous Implants Product Portfolios and Specifications
