Investment firms are financial institutions that fund companies to help them grow. Investment firms invest growth equity capital into a newly formed business that they believe has long-term growth potential. Firms typically gain equity or ownership with their investment, while the newly emerged company gains financial growth opportunity.

Investment firms will also act as a financial mentor for businesses and help ensure the business makes financially sound decisions that further develop the company. Businesses reap many benefits to having investment firms involved in their business. The greatest benefit is the opportunity to expand without relying on bank loans. Investors benefit from utilizing investment portfolio management software when building and managing investment accounts.

The global Investment Firms market size is projected to grow from US\$ 882.4 million in 2023 to US\$ 2045.2 million in 2030; it is expected to grow at a CAGR of 12.8% from 2024 to 2030.
