The global IoT Hotel Automation System market size is predicted to grow from US$ 180 million in 2025 to US$ 259 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

The IoT Hotel Automation System, centered on IoT technology, utilizes intelligent gateways, sensor networks, and a cloud platform to provide a comprehensive solution for centralized monitoring and intelligent management of hotel facilities, environments, and services. The system uses smart devices deployed in guest rooms, corridors, and public areas to collect real-time environmental data, device status, and guest behavior information, transmitting this information to the cloud platform via Wi-Fi, Zigbee, or LoRa protocols. The platform analyzes this data to automatically adjust air conditioning temperature, control lighting settings, manage energy consumption, and provide real-time updates on room status, coordinated security alerts, and remote diagnosis of equipment failures. Its core value lies in enhancing the guest experience (e.g., seamless check-in and personalized environmental adjustments), reducing hotel operating costs, and optimizing service processes through data-driven decision-making, ultimately achieving digital and intelligent transformation and upgrades for hotels.

United States market for IoT Hotel Automation System is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for IoT Hotel Automation System is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
