IoT in Hospitality is the integration of connected devices, smart sensors, automation hardware, and cloud-based management systems within hotel facilities to create smart rooms, intelligent building functions, personalized guest services, and highly efficient hotel operations. IoT enables hotel equipment—such as smart door locks, HVAC units, lighting, TVs, minibars, occupancy sensors, thermostats, elevators, energy meters, and service robots—to communicate with each other and with hotel management platforms, allowing both staff and guests to monitor and control the environment in real time. Using IoT, hotels can automate check-in/check-out, enable mobile keyless entry, offer personalized room settings (temperature, lighting, entertainment), optimize housekeeping and maintenance scheduling, implement predictive maintenance, monitor energy use, and deploy smart surveillance and safety systems.
