The global IQF Frozen Mushrooms market size is predicted to grow from US\$ 395 million in 2025 to US\$ 545 million in 2032; it is expected to grow at a CAGR of 4.8% from 2026 to 2032.

IQF frozen mushrooms refer to mushroom products processed using Individually Quick Frozen (IQF) technology. This process freezes individual mushrooms in a very short time, effectively preserving the quality, flavor, color, texture, and nutrients of fresh mushrooms, and extending the shelf life to 24 months.

Driving Factors

1. Consumers' Dual Pursuit of Convenience and Health

Convenience Needs: With the fast pace of modern life, consumers (especially younger generations) prefer to buy time-saving and convenient semi-finished food products. IQF frozen mushrooms are ready to use right out of the bag, perfectly matching this trend.

Healthy Eating Trends: Mushrooms are rich in dietary fiber, antioxidants, and B vitamins, and are considered a healthy food. IQF technology maximizes the preservation of their nutritional value and does not add preservatives, aligning with consumers' preferences for 'clean labels' and natural foods.

2. Strong Demand from the Catering and Food Industry

Cost and Efficiency Advantages: For chain restaurants, hotels, and food processing plants, IQF frozen mushrooms are cheaper than fresh mushrooms ('lowest cost per

pound of processed mushrooms'), eliminating the need for washing and preparation, significantly improving kitchen efficiency, and offering a high degree of product standardization.

Supply Stability: Fresh mushrooms are perishable and seasonally affected. IQF technology ensures a stable supply and price throughout the year, which is crucial for catering and industrial users.

3. Advances and Globalization of Cold Chain Logistics Technology

Improved Infrastructure: Continuous optimization of the global cold chain logistics system, including more advanced refrigeration technology and 'last-mile' delivery solutions, enables IQF frozen products to be transported over long distances with lower spoilage and higher quality, reaching a wider market.

Global Trade Facilitation: A well-developed cold chain network facilitates international trade in IQF mushrooms, allowing countries to easily import and export different varieties of frozen mushrooms, enriching market choices.
