IQF frozen pineapple refers to pineapple chunks, dices, or slices processed with Individually Quick Frozen technology, allowing each piece to freeze separately without clumping. This rapid freezing method preserves the fruit's natural color, aroma, nutrients, and fresh-like texture while maintaining high piece integrity. IQF pineapple offers excellent free-flowing quality, stable performance, and easy handling in food processing, making it widely used in beverages, bakery products, foodservice preparations, mixed frozen fruit blends, and ready-to-eat foods. Compared with traditional block freezing, IQF pineapple provides better flavor retention, consistency, and convenience, and has become one of the most important tropical fruit ingredients in the global frozen fruit supply chain.

Based on consolidated industry databases, export statistics, and capacity data from major producing regions, the global production of IQF frozen pineapple in 2024 is estimated at approximately 0.65 to 0.85 million tons, reflecting continued expansion of processing capacity and more concentrated raw fruit supply. Weighted by product specifications and food grade requirements, mainstream global FOB prices range from USD 900 to USD 1,300 per ton.
