The global Iruplinac Tablets market size is predicted to grow from US\$ 16.83 million in 2025 to US\$ 58.16 million in 2032; it is expected to grow at a CAGR of 9.2% from 2026 to 2032.

Iruplinalkib is a new-generation selective RET tyrosine kinase inhibitor independently developed in China. Targeting RET fusions and RET mutations, it is mainly applied in the clinical treatment of locally advanced or metastatic non-small cell lung cancer, medullary thyroid carcinoma and other malignant tumors with positive RET fusion after prior treatment. By specifically inhibiting the abnormal activation of the RET kinase signaling pathway, the drug blocks the proliferation, invasion and metastasis of tumor cells. Featuring high target selectivity, favorable safety and independent domestic innovation advantages, it optimizes the precise treatment regimens for tumors with RET alterations. Currently included in the national medical insurance catalog, it is widely used in clinical oncology treatment across China. In 2025, global Iruplinalkib production reached approximately 107,000 bottles.

As a highly selective RET inhibitor independently developed in China, Iruplinalkib boasts significant market competitiveness in the treatment of RET fusion-positive tumors. Driven by the ?? rising demand for precision medicine, expanding national medical insurance coverage and growing clinical recognition in China, its market penetration has advanced steadily. Compared with imported drugs of the same class, Iruplinalkib holds a key position in indications such as advanced non-small cell lung cancer and medullary thyroid carcinoma, supported by clinical data better tailored to Chinese patients, favorable safety and accessibility advantages. While competition in the RET targeted therapy space is intensifying, the product continues to consolidate its clinical and market position through differentiated efficacy and domestic innovation attributes. It is expected to further unlock growth potential via indication expansion, channel penetration and overseas market layout in the future.
