Iso amyl acetate, also known as isoamyl acetate, is a colorless, volatile organic ester liquid. It has a strong and pleasant banana flavor and is commonly used in edible fruit flavorings, solvents, and chemical extractants. It is produced by the esterification reaction of acetic acid and isoamyl alcohol.

The core upstream raw materials are mainly isoamyl alcohol and glacial acetic acid. The production process primarily employs esterification, with the key technology being the application of highly efficient catalysts to reduce waste acid generation and improve conversion rates. Downstream applications are highly diversified, primarily covering the food and beverage, daily chemical flavoring, and industrial solvent sectors.

Global sales in 2025 were approximately 16,000 tons, with an average selling price of US\$1,798 per ton. The industry's gross profit margin is between 20% and 30%.
